ANNOUNCEMENTS

Standard projects

13 days ago

Having trouble coming up with a final project? We put together two projects that you can do, WordGuessing and BrickBreaker. See the final project page for more details. They are both a bit challenging. If you come up with your own project it doesn't need to be nearly this hard :-).

Final projects start today!

16 days ago

Wahoo! Your final project is a chance to build something which celebrates what you have learned. It can be small, it can be humble, just make something. If you want, we will put your submission on a website that the whole world can see, so that others can recognize what you have achieved.
